

Project Initialization and Planning Phase

Date	15 March 2026
Team ID	SWTID-2026-5339
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A student preparing for examinations or learning a new subject.	Understand complex concepts, clear doubts, summarize study materials, and assess my knowledge through quizzes.	Learning resources are scattered across different platforms, explanations are often difficult to understand, and creating personalized quizzes or study plans takes significant time.		Frustrated, overwhelmed, and less confident about my learning progress and exam preparation.
PS-2	A self-learning student or beginner.	Find a structured roadmap to learn a new technology or subject effectively.	There is no personalized guidance, and it is difficult to identify the correct sequence of topics and reliable learning resources.		Confused about where to begin and worried about wasting time on irrelevant content.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-3	An educator or mentor.	Provide students with instant explanations, quizzes, and summaries to improve engagement.	Preparing learning materials manually requires considerable time and effort.		Overburdened and unable to provide personalized support to every student.
