

Empathy Map

Date	15 March 2026
Team ID	SWTID-2026-5339
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS - I need a platform that can answer my study-related questions instantly. - I find it difficult to understand complex topics from textbooks. - I wish I had personalized quizzes and study recommendations for better preparation.	Rahul Sharma (Example User) Undergraduate Student / Self-Learner	THINKS - I want to improve my learning efficiency and save time. - There should be one platform for explanations, summaries, quizzes, and learning guidance. - AI can help me learn faster if it provides accurate and simple explanations.
DOES - Searches for answers on Google and YouTube. - Reads lengthy notes and online articles before exams. - Takes quizzes to evaluate knowledge and follows online learning resources.		FEELS - Frustrated when explanations are difficult to understand. - Confused by the abundance of learning resources available online. - Motivated and confident when receiving personalized guidance, summaries, and instant answers.
