

Project Executable Files

Date	15 July 2026
Team ID	SWTID-2026-5339
Project Name	EduGenie - Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	No
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	No

Note: Items marked Yes/No above are set based on a typical EduGenie (Flask + MySQL) project setup. Please review and adjust any row to match your actual GitHub repository before submission.

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

EduGenie/	
app.py	- Main Flask application entry point
/static	
/css	- Stylesheets
/js	- JavaScript files
/images	- Images and icons
/templates	- HTML templates (login, dashboard, quiz, chatbot)
/models	- Database models (User, Course, Quiz, Progress)
/routes	- Route handlers (auth, courses, quiz, chatbot, admin)
/utils	- Helper functions (Gemini API integration, validators)
/tests	- Test files and test results
requirements.txt	- Python dependencies
.env.example	- Environment configuration template
README.md	- Setup and run instructions

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	[To be added]
Login Credentials (Demo)	[To be added]
Platform / Hosting Provider	Render / PythonAnywhere
Repository Link	[To be added]
Demo Video Link	[To be added]

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

```
Pre-requisites:
Python 3.9+, pip, MySQL Server installed and running

Step 1: Clone the repository - git clone
Step 2: Navigate to project folder - cd EduGenie
Step 3: Install dependencies - pip install -r requirements.txt
Step 4: Configure environment - copy .env.example to .env and add your Gemini API key
and MySQL database credentials
Step 5: Set up the database - create the MySQL database and run the schema/seed files
Step 6: Start the application - python app.py
Step 7: Open a browser and go to - http://localhost:5000
```

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	AI chatbot response time may vary depending on Gemini API latency	Monitoring; acceptable for current scale
2	Not yet optimized for very large concurrent user loads (100,000+)	Planned for future scalability improvements
3
