

Demonstration of Proposed Features

Date	15 March 2026
Team ID	SWTID-2026-5339
Project Name	EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Question Answering	Users can ask study-related questions and receive accurate AI-generated answers using Google Gemini.	Implemented	Yes	Successfully demonstrated during testing.
2	Topic Explanation	Generates simple and detailed explanations for any learning topic.	Implemented	Yes	Demonstrated with multiple academic concepts.
3	Text Summarization	Converts lengthy study material into concise summaries for quick revision.	Implemented	Yes	Successfully tested with sample text.
4	Quiz Generation	Automatically generates multiple-choice questions with four options and correct answers.	Implemented	Yes	Quiz generation and evaluation demonstrated successfully.
5	Personalized Learning Path Recommendation	Provides a structured learning roadmap with recommended resources based on the selected topic.	Implemented	Yes	Learning path generated for various subjects.
6	FastAPI Web Application Integration	Integrates frontend, backend, and Google Gemini API through REST endpoints for a complete AI learning platform.	Implemented	Yes	Complete application demonstrated successfully.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%

Demonstration Summary:

The EduGenie application was successfully demonstrated with all planned features. Users were able to interact with the web interface to ask questions, obtain concept explanations, summarize study material, generate quizzes, and receive personalized learning recommendations. The FastAPI backend communicated seamlessly with the Google Gemini API, and all outputs were displayed dynamically on the frontend. Functional testing confirmed that every proposed feature was implemented and demonstrated successfully.
